

ALFREDO RESENDIZ BARRERA

(427)1092310 - Queretaro, Mexico (Open to Relocate) - resendizbaalfredo20@gmail.com -
www.linkedin.com/in/alfredo-resendiz-ing

Aspiring Data Analyst with a background in software management and development, and hands-on experience in data analysis, reporting, and dashboard creation within technical environments. Skilled in Python for data handling, requirements gathering, and transforming operational data into actionable insights. Strong interest in growing into data-focused roles.

PROFESSIONAL EXPERIENCE

QC Intern

2021 -2022

Delivered technical support across South American and Caribbean regions, specializing in installations, WL, MW, and FTTX via an internal platform.

QC Engineer

2022 - 2026

- Provided remote support through the internal platform for 4G, 5G, MW, MBB, and FTTX installations.
- Developed and maintained operational dashboards for regional offices (Argentina, Chile, and Peru), providing visibility into field incidents, incident lifecycle tracking, equipment performance, recurring issue analysis, and KPI impact assessment to support data-driven decision-making.
- Gathered requirements and performed data analysis to support operational and reporting needs.
- Improved team workflow efficiency and enhanced installation manuals for WL and MW.
- Created supporting documentation to assist the team's daily operations.

EDUCATION

Universidad Tecnologica de San Juan del Rio

2018-2020

TSU in IT (Multiplatform Software Development Area).

Universidad Tecnologica de San Juan del Rio

2020-2022

Engineering in software management and development

COURSES
