PROFESSIONAL SUMMARY

Aspiring Data Analyst with 4 years of experience in technical quality control, focused on turning telecom operational data into actionable reports and dashboards. Hands-on experience building Power BI dashboards for 3 Latin American countries, plus independent data analysis projects with Python. Looking to move full-time into data analytics, BI, and data-driven decision making.

PROFESSIONAL EXPERIENCE

QC Engineer

Aug. 2022 – May 2026

Technical quality control and operational data analysis — Argentina, Chile, and Peru

- Designed and maintained 3 Power BI dashboards (one per country: Argentina, Chile, and Peru) to track KPIs, incident lifecycle, and operational efficiency, used on an ongoing basis by regional teams.
- Cleaned, validated, and transformed operational datasets from multiple regional sources, ensuring consistent, error-free reporting for decision making.
- Segmented data by country, technology, incident type, and lifecycle stage to identify trends, bottlenecks, and recurring issues.
- Performed exploratory data analysis (EDA) to detect anomalies and process improvement opportunities, presenting findings directly to stakeholders.
- Gathered reporting requirements from business teams and translated them into dashboards and actionable insights.
- Provided remote operational support for 4G, 5G, MW, MBB, and FTTX network deployments across the three regions.
- Standardized technical documentation for WL and MW installations, improving team workflow efficiency.

QC Intern

2021 – 2022

Regional technical support — South America and the Caribbean

- Delivered remote technical support for WL, MW, and FTTX installations via an internal platform, covering multiple countries across South America and the Caribbean.
- Documented incidents and support requests, laying the groundwork for later operational reporting.

DATA ANALYSIS PROJECTS

Supermarket Sales & Performance Dashboard

github.com/Alfredo20207/Supermarket

- Built an interactive analytical dashboard in Python to explore, filter, and visualize the commercial performance of a retail chain.
- Designed the solution to support strategic decision-making through dynamic exploration of sales metrics and geographic behavior.

EDUCATION

Engineering in Software Management and Development

2020 – 2022

Universidad Tecnológica de San Juan del Río

Associate Degree in IT — Multiplatform Software Development

2018 – 2020

Universidad Tecnológica de San Juan del Río

COURSES AND CERTIFICATIONS

- CCNA Routing and Switching: Introduction to Networks
- Introduction to Cybersecurity
- Programming Essentials in Python
- Introduction to Data Science
- Software Test Execution Certification
- Introduction to Power BI

SKILLS

Data & BI: Power BI, SQL, Python (pandas), exploratory data analysis, Advanced Excel, Power Automate

Development: HTML, JavaScript, Dart, Angular, Android Studio, Git (GitHub, Bitbucket), Visual Studio Code, Railway

Office: Word, PowerPoint, Outlook

Languages: Spanish (native), English (B1)
